## **DC100 Dashcam App User Guide**

# DC100 App User Guide

## How To Connect To The DC100

To connect to the DC100 to live stream, view images or videos, change settings or delete/reformat the SD card follow the steps below:

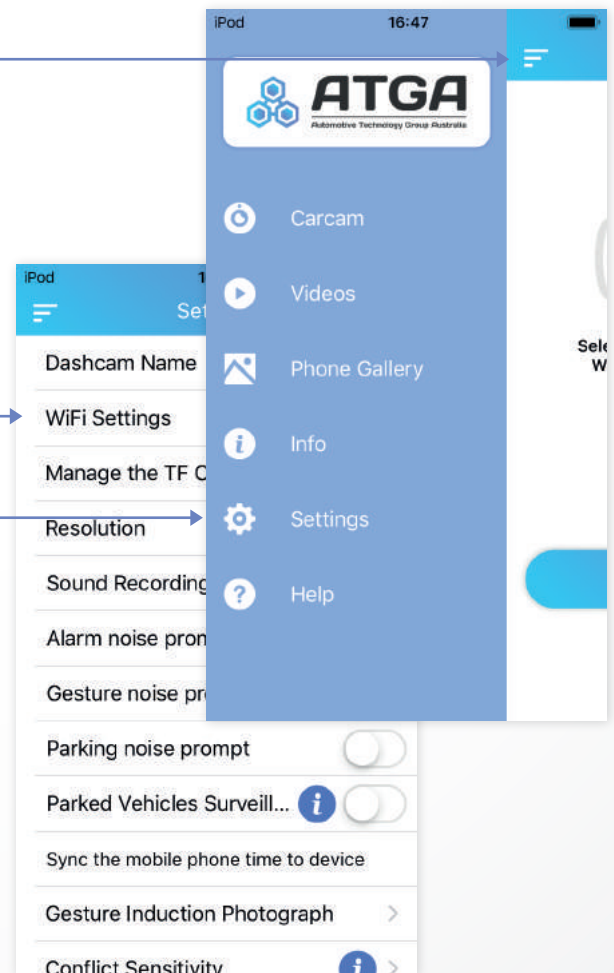

1. **Turn on your WiFi** on the device you wish to view the DC100 on.
2. Select the WiFi name for the **DC100** you wish to connect to under the WiFi options. Please note this may disable your mobile data.
3. Enter the **default password (12345678)**. If you have changed the password from the default enter the new password.

## How To Change The DC100 Password

It is recommended to change the DC100 password to maintain the data security. This can be performed by following the below:

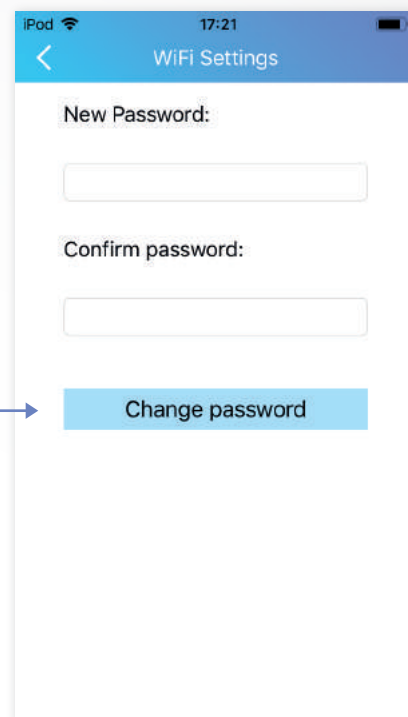

1. **Connect** to the DC100 as per the **HOW TO CONNECT TO THE DC100** section.
2. **Open** the ATGA DC100 app.
3. Select the **Menu** option in the top left corner of the home screen.
4. Select the **Settings** option.
5. Select **WiFi settings**.

6. Enter the new WiFi password then select **Change password**.

7. Once the new password has been entered the DC100 will **need to be power cycled**. This can be complete by removing the power cable from the DC100 for 30 seconds.

8. **To connect to the DC100** you will need to follow the steps as per **HOW TO CONNECT TO THE DC100** and enter the new password.

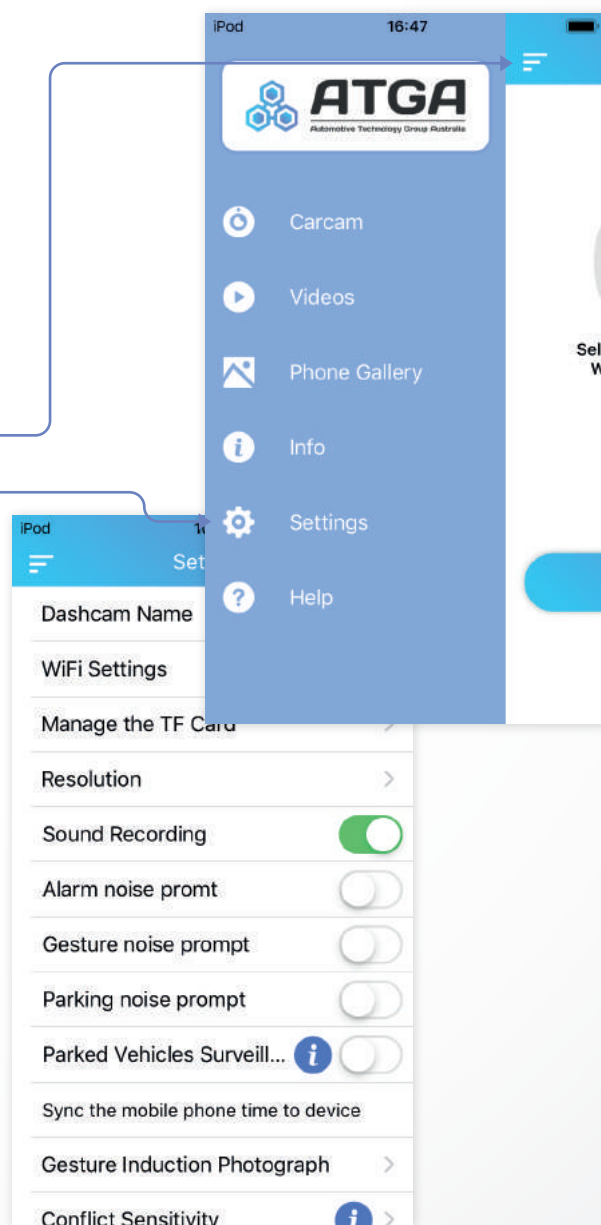

## How To Modify The DC100 Settings

To modify or view the settings of the DC100 follow the below steps:

1. **Connect** to the DC100 as per the HOW TO CONNECT TO THE DC100 section.
2. **Open** the ATGA DC100 app.
3. Select the **Menu** option.
4. Select the **Settings** option.

Some settings can be **TOGGLED** on or off such as:

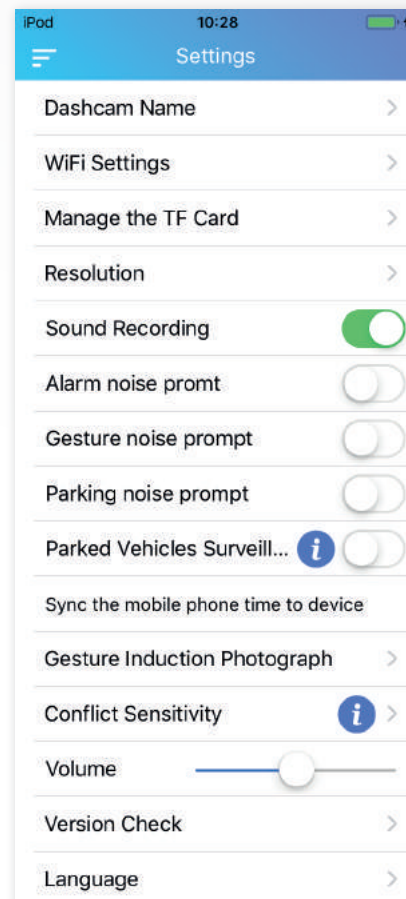

- **Sound recording** – Records the noise within the surrounding area of the DC100.
- **Alarm noise prompt** – Provides an audible noise when events occur such as an image being taken or noise on start up.
- **Gesture noise prompt** – Provides an audible noise when the gesture image is taken.
- **Parking noise prompt** – Provides an audible noise when the DC100 enters or exits parking mode
- **Parked vehicle surveillance** – This is the parking mode to record whilst when the asset is parked.

Others are altered within their own specific sections. To modify or change these enter the section and modify as per your needs:

- **Manage the TF card** – You can format and delete folders on the SD card.
- **Resolution** – This is to alter the recording quality between 1080p and 720p.
- **Sync the mobile phone time to device** – This will sync the DC100 time recording to the same time as your mobile device.
- **Gesture induction photography** – This will increase or decreases the sensitivity of the DC100 gesture sensor.
- **Conflict sensitivity** – This is the sensitivity of the G-SENSOR to detect an incident such as a crash.

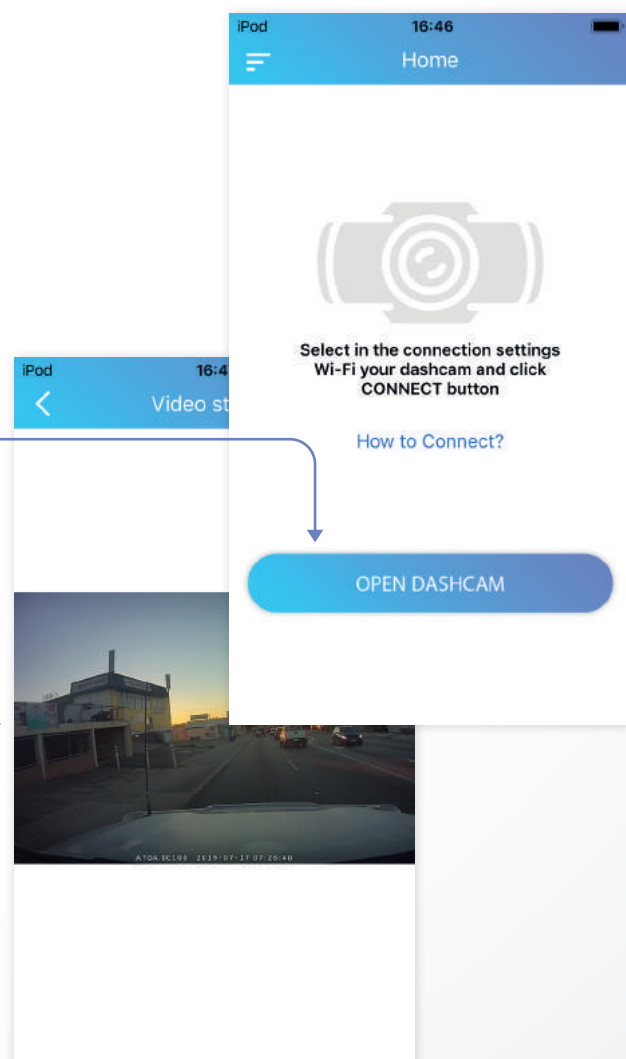

## How To Live Stream

Should you wish to live stream the camera whilst within the vehicle please follow the below steps:

1. **Connect** to the DC100 as per the **HOW TO CONNECT TO THE DC100** section.
2. **Open** the ATGA DC100 app.
3. **Select the LIVE option** on the home screen. This will connect you to the **Live view of the camera**. Please note this will have a short delay with transmissions.

*NOTE – In many countries and states/territories it is illegal to use your mobile phone or device whilst operating the vehicle. Please consult your local laws prior to utilising your mobile phone or device whilst operating the vehicle.*

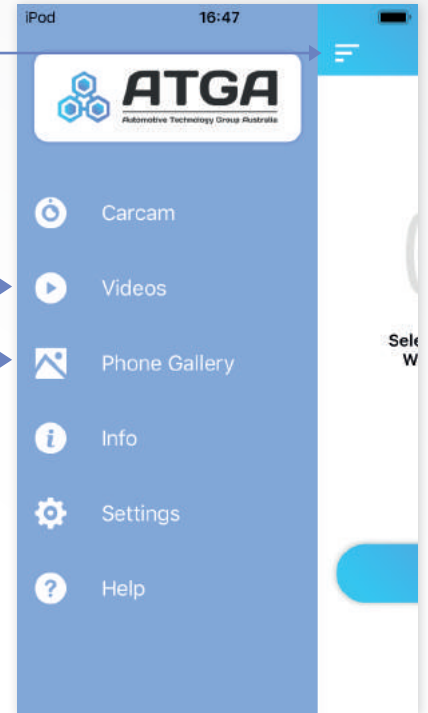

## How To View Images/Videos

To access, view or download the images and videos stored on the DC100 please follow the steps below:

1. **Connect** to the DC100 as per the **HOW TO CONNECT TO THE DC100** section.
2. **Open** the ATGA DC100 app.
3. Select the **Menu** option.
4. Select the **Videos** option to view the **loop** and **incident video** options.

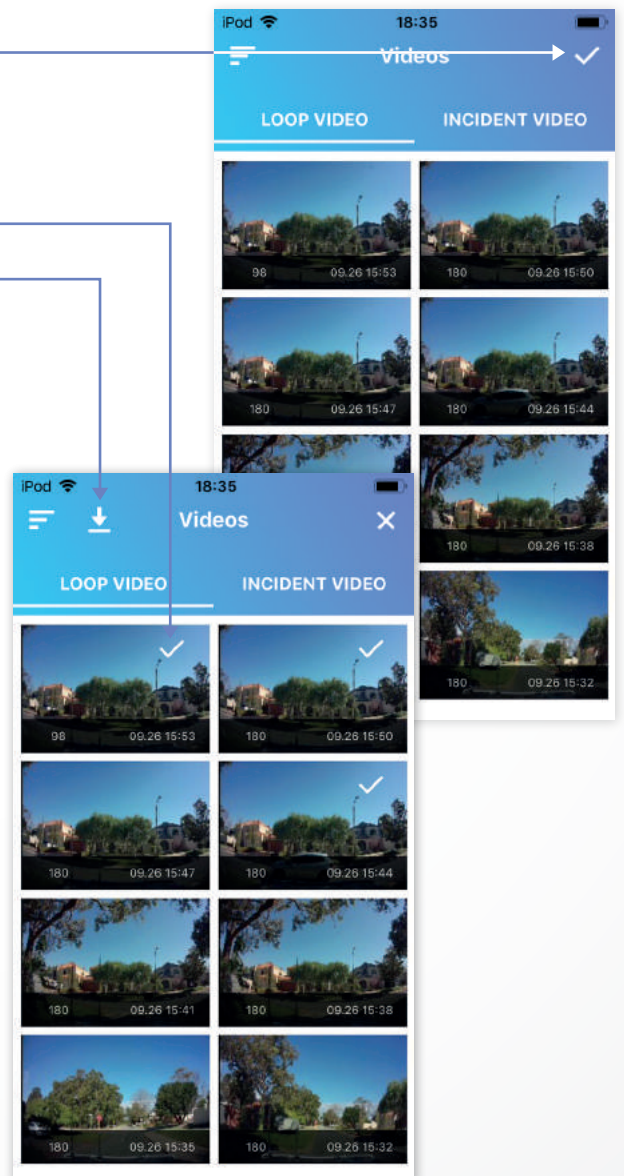

To view the images, select the **Phone gallery** option to view the **alarm, gesture** and **parking** images.

To **download** either a video or photo select the appropriate gallery and complete the steps.

1. Select the **Tick** in the top right-hand corner of the gallery.
2. **Click** on image/video you wish to download.
3. Select the **Download** function in the top left corner.

*NOTE – To cancel the download select the Close icon in the top right corner if the images/video are still selected.*

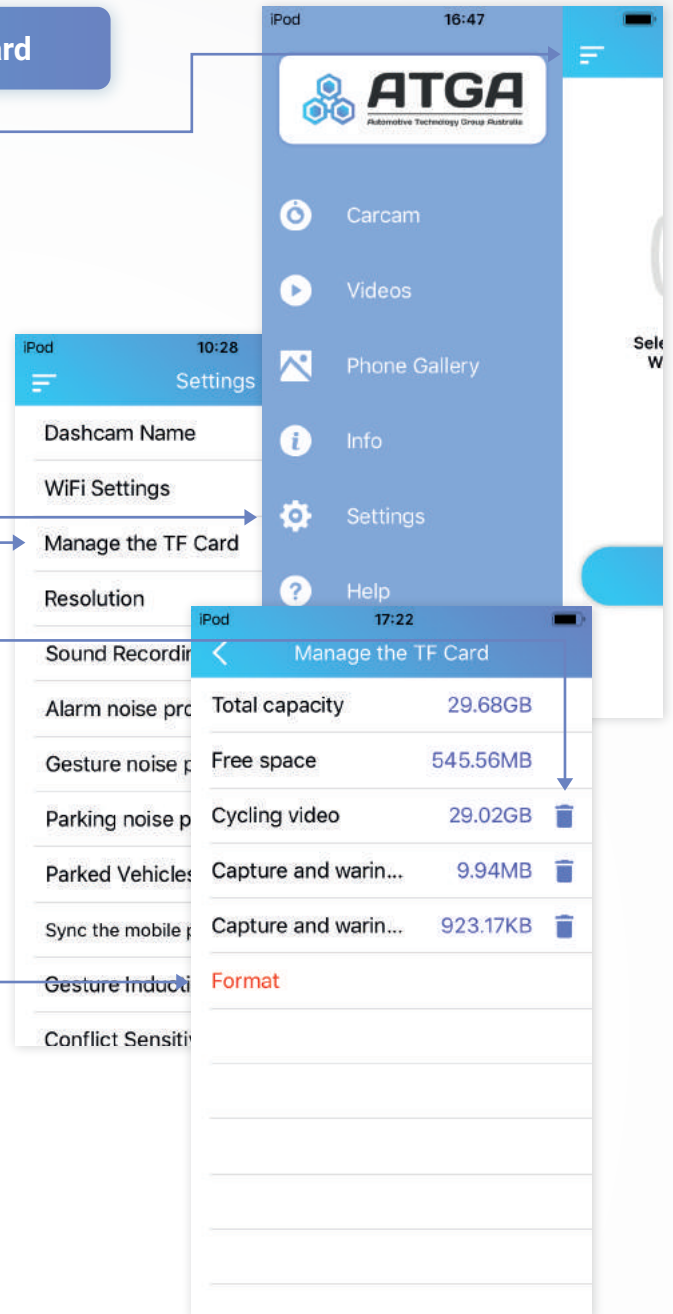

## How To Format Or Delete Data On The SD/TF Card

To format, reformat or delete data from the SD card follow the below steps:

1. **Connect** to the DC100 as per the **HOW TO CONNECT TO THE DC100** section.
2. **Open** the ATGA DC100 app.
3. Select the **Menu** option.
4. Select the **Settings** option.
5. Select the **Manage the TF card** section.
6. To delete the data for a specific folder, select the **Trash can** for the folder.
7. To format or reformat the SD/TF card select the **Format** section.

*NOTE – It is recommended to periodically view the INCIDENT images and VIDEO to ensure all required data is stored on an external device. Once these have been downloaded it is recommended to periodically delete the locked CAPTURE AND WARNING IMAGES/VIDEOS to maximise the storage space.*

## How To Contact Support Or Find Out About Other Products

We will continue to update the **FAQ** section as such it is a great resource to consult. Should you be unable to resolve any issue our support staff can be contacted by emailing [INFO@ATGA.COM.AU](mailto:INFO@ATGA.COM.AU) or by contacting your local dealer.

**Automotive Technology Group Australia** has a wide range of products and offerings including dash cameras, GPS solutions and more. Contact your local dealer or our team to discuss any questions, comments or enquiries.
